Petr Füzék new Director Business Line OEM at DCS

Berlin, November 6, 2023 - Petr Füzék is the new Director Business Line OEM at DCS. Petr has many years of experience in the automotive, e-mobility and charging infrastructure sectors. As of now, he is responsible for the OEM area as Team Lead and will expand it through further cooperations as well as further consolidate existing ones.

We are pleased to announce that Petr Füzék is our new Director Business Line OEM as of November 1, 2023. Petr Füzék brings a great deal of experience and know-how from the automotive, e-mobility and charging infrastructure sectors to the position of Director Business Line OEM. He is excellently networked and can perfectly apply his expertise, which he gained during his stations e.g., at EcoG, Sygic, EW Eurowag as well as Škoda Auto, to DCS.

"I am looking forward to leading a team of great experts and offering customers charging services from one of the most successful e-mobility companies on the market. At a time when electric vehicles are traveling ever greater distances and offer extremely high charging performances, a consistent and reliable charging solution is simply essential. The electric vehicle market is experiencing unprecedented growth, integrating new cutting-edge technologies for a seamless user experience. The demand for a reliable public charging solution across Europe has never been more important. DCS is part of an unprecedented transformational movement from combustion to e-vehicles - because you can't do it without charging infrastructure," explains Petr Füzék, new Director Business Line OEM at DCS.

The current dynamics in the electric mobility market are both a new challenge and an exciting experience for Petr Füzék. The perfect combination of his passion for innovation and excellence makes his move to DCS particularly exciting.

About Digital Charging Solutions GmbH

Digital Charging Solutions GmbH (DCS) develops digital charging solutions for automotive OEMs and fleet operators, making it one of the key global drivers of the shift to electromobility. DCS' white-label charging solutions enable OEMs and fleet operators to realize their electromobility strategies. With integrated digital solutions, DCS makes charging at charging stations easy, safe, and convenient. In doing so, Digital Charging Solutions GmbH offers access to one of the largest charging networks in Europe with more than 590,000 charging points in 31 markets worldwide and cross-national charging. Since the beginning of 2019, Digital Charging Solutions GmbH has been part of the mobility joint venture of the BMW Group and Daimler AG. In fall 2021, bp became the third shareholder.
