Patrick Meinelt new Director CPO Network & Portfolio Management at DCS

Berlin, May 22, 2024 – Digital Charging Solutions GmbH can announce another new addition:

Patrick Meinelt has been the new Director CPO Network & Portfolio Management since May 01, 2024. With his many years of international experience in sales, business development and partner management, he will strengthen DCS's strategic partnerships with key industry players. This will give DCS customers uncomplicated access to attractive products and convenient charging services.

Industry expert Patrick Meinelt joined the DCS team on May 1, 2024, as the new Director CPO Network & Portfolio Management. He has many years of international experience in the automotive and e-mobility sectors as well as charging station infrastructure, which he gained at renowned companies such as IONITY, P3 Group, Volkswagen Group China, BMW, and Toyota/Lexus USA.

Patrick Meinelt has extensive leadership experience including scaling Europe's leading High Power Charging Network at IONITY. With his focus on B2B business and partnerships with charging service providers (EMP) as well as his deep understanding of the roaming and electric mobility ecosystem, Patrick's background is positioned to make a significant contribution to DCS's mission.

Patrick Meinelt about his new position: "Seamless, barrier-free and comprehensive access to the charging network, the highest service quality, availability and reliability, coupled with attractive, competitive and fully dynamic pricing, are the key success factors for sustainable e-mobility solutions and a future-proof business orientation for our industry. One of the most important partnerships for implementing this is between leading e-mobility service providers and charging network operators. I am convinced that with complementary and effective business relationships we can deliver effective e-mobility offerings and services for shared customers. With many years of industry experience, especially at the leading charging network operator IONITY, I am ideally equipped to decisively advance and help shape the mobility transition at DCS."

Patrick Meinelt is looking forward to his new tasks and his team of dedicated experts. Together with them and the entire DCS team, he wants to further strengthen the Charging Network partnerships and provide outstanding charging services for e-drivers throughout Europe.

About Digital Charging Solutions GmbH

Digital Charging Solutions GmbH (DCS) develops digital charging solutions for automotive OEMs and fleet operators, making it one of the key global drivers of the shift to electromobility. DCS's white label charging solutions enable OEMs and fleet operators to realize their electromobility strategies. With DCS's own charging service CHARGE NOW, EV drivers also benefit directly from access to one of the largest charging networks in Europe. With integrated digital solutions, DCS makes charging at charging stations easy, safe, and convenient. In doing so, Digital Charging Solutions GmbH offers access to one of the largest charging networks in Europe with more than 700,000 charging points in 31 markets worldwide (Europe and Japan) and cross-border charging. Since the beginning of 2019, Digital Charging Solutions GmbH has been part of the mobility joint venture of the BMW Group and Daimler AG. In fall 2021, bp became the third shareholder.
