### **eMobility Excellence Report 2024: DCS's digital charging services achieve top rankings for the fourth year in a row**

**Berlin, 05. July 2024 – Once again, the charging services of Digital Charging Solutions GmbH (DCS) were awarded top places in the eMobility Excellence Report 2024. All the company's white label solutions were rated as very good or good - including the winner, Mercedes Me Charge L. The report, which is created annually by Charging Radar, p3 and CIRRANTIC, is one of the most important market comparisons of charging services for users of electric vehicles.**

For the fourth year in a row, the white label charging solutions from DCS achieved top positions in the eMobility Excellence Report rankings. The highest-placed charging services in the car manufacturer category are mainly white label solutions from DCS. In addition to the winner Mercedes Me Charge L, the services BMW Charging Active Ionity Plus, BMW Charging Active and Hyundai Smart were also awarded the top marks of very good and good and top places. All the award-winning solutions were developed in collaboration with DCS. DCS's own CHARGE NOW service also received a good rating and scored particularly well in network coverage, taking first place in the independent provider category.

The eMobility Excellence Report annually evaluates various charging services based on key criteria for a positive user experience, such as the number of connected charging points, the different rates or the user experience of the app. The report thus offers a decisive orientation aid for users of electric vehicles.

Jörg Reimann, CEO of Digital Charging Solutions GmbH, says: "We are thrilled that our charging solutions have once again been recognized in this year's eMobility Excellence Report. This industry award confirms that we are achieving our goal of offering EV users a positive experience and making the charging process simple and effortless thanks to our innovative solutions. In this way, we are making a decisive contribution to the transition in the mobility sector. In the field of e-mobility, business models that offer optimum customer benefits are particularly in demand. We achieve this with the help of reliable data, digital services and nationwide access to the charging infrastructure."

The company Digital Charging Solutions GmbH (DCS) provides both business and private customers with integrated digital solutions to connect drivers of electric vehicles with the charging infrastructure. The company pools data from over 1,000 charging point providers and offers its users access to over 700,000 charging points in 30 European markets. With the help of a DCS application, customers can easily and simply find a charging point in the network, charge their vehicle using an RFID card or app and pay by monthly invoice.

#### **About Digital Charging Solutions GmbH**

Digital Charging Solutions GmbH (DCS) develops digital charging solutions for automotive OEMs and fleet operators, making it one of the key global drivers of the shift to electromobility. DCS's white label charging solutions enable OEMs and fleet operators to realize their electromobility strategies. With DCS's own charging service CHARGE NOW, EV drivers also benefit directly from access to one of the largest charging networks in Europe. With integrated digital solutions, DCS makes charging at charging stations easy, safe, and convenient. In doing so, Digital Charging Solutions GmbH offers access to one of the largest charging networks in Europe with more than 700,000 charging points in 31 markets worldwide (Europe and Japan) and cross-border charging. Since the beginning of 2019, Digital Charging Solutions GmbH has been part of the mobility joint venture of the BMW Group and Daimler AG. In fall 2021, bp became the third shareholder.
